

# Road Network of Banteay Meanchey Province

Road network, both paved and unpaved road, is the major form of transportation in Banteay Meanchey province. All the nine districts, including cities, are connected with paved road.

## Road Network Size

Both Poipet and Serei Saophoan have the most paved road network, in terms of size as well as density, among all the districts in the province. This is since these districts are the most urbanized areas among the others.
